

# AN UPDATE TO MOTORISTS AND THE GENERAL PUBLIC

## WESTMOORINGS TO DIAMOND VALE INDUSTRIAL ESTATE AND ENVIRONS

### INCREASE OF CONSTRUCTION ACTIVITIES - NATURAL GAS PIPELINE TO DIEGO MARTIN.

The National Gas Company (NGC) began construction works on a 152 mm diameter carbon steel pipeline system to e-Teck Park at Diamond Vale on December 18, 2010.

The duration of the project is twelve (12) months from December 18, 2010.

#### Construction Schedule

Work is scheduled for off peak periods - Mondays to Saturdays (from 8:00 pm on a particular day to 5:00 am the following day), public holidays and at nights.

The Works are being executed in such a manner as to maintain operation of all through lanes as far as possible. Where construction is expected to disrupt the flow of traffic, an approved Traffic Management Plan will be utilized ensuring that at least one lane remains operational at all times. Police or traffic wardens will be on hand to control the flow of traffic whenever necessary. Mitigation measures will be implemented to reduce levels of noise and dust generated during construction activities.

#### Transportation of Joints of Pipe to Site

152mm diameter pipe joints will be transported by A.P.I. Pipeline Construction Company Limited via trucks and trailers from Fyzabad to Diego Martin.

Route: The vehicles will travel along the Solomon Hochoy Highway onto the Uriah Butler Highway, onto the Churchill Roosevelt Highway, onto Wrightson Road, onto the Audrey Jeffers Highway and then into Diego Martin.

#### Hours of activity: between 6:00 a.m. and 6:00 p.m.

Motorists and Pedestrians using the route are urged to be on the lookout for these large vehicles, to be alert and to heed the sound of loud and blaring horns. Please exercise extreme caution, especially at intersections and in particular at the intersection of the Western Main Road and the Diego Martin Highway.

Please follow the instructions of the Traffic Police.

#### Stringing, trenching, pipe laying, radiographic testing and site restoration.

The pipeline shall pass beneath environmentally sensitive areas such as major roads, rivers and utility pipelines and will be installed by Horizontal Directional Drilling (HDD). This is to minimize the impact of construction activities on the general public, local communities and the environment.

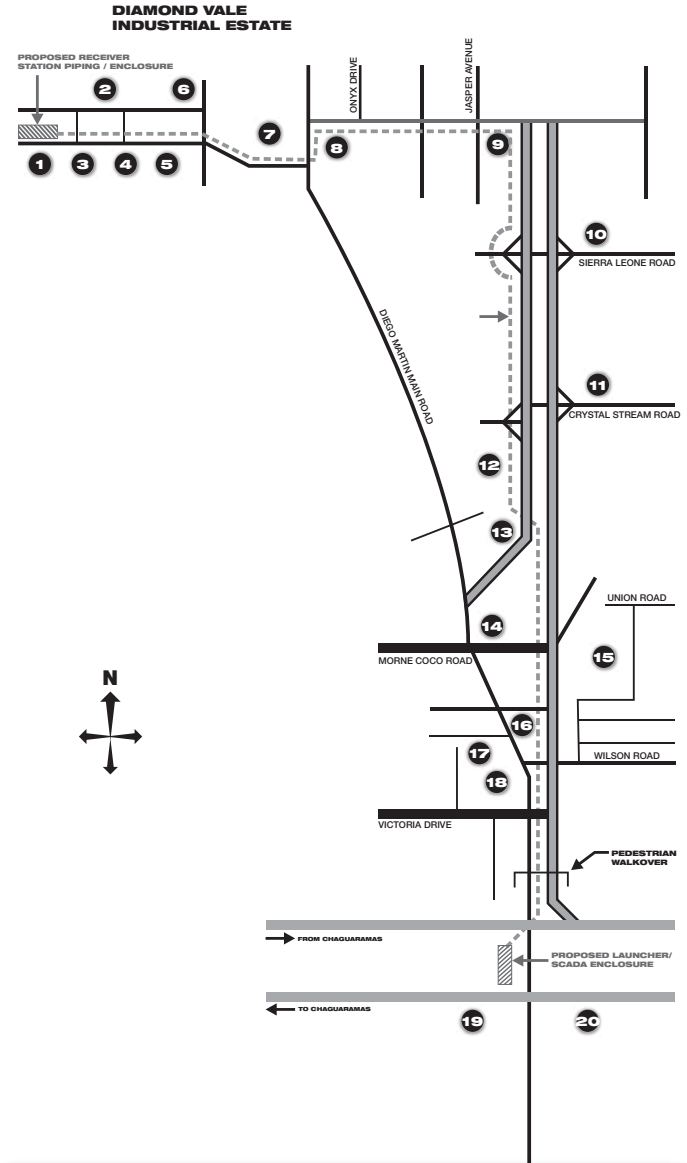

#### Safety measures during construction:

- The immediate construction area will be cordoned off
  - The area will be kept well lit at night
  - All excavated areas will be kept secured at all times
  - Welding will be shielded to prevent glare
  - Radiographic testing of welded joints will be carried out during low traffic periods or within private property with adequate space.
- A 12 m "safe perimeter" will be cordoned off to ensure the public's safety.

NGC will continue to update the public as the project progresses via the media and fliers. Local communities will also be advised in advance of any activity that is likely to impact their everyday activities.

**NGC apologizes for any inconvenience that may be caused and thanks you for your co-operation. We also wish to assure you that we will continue to exercise the utmost vigilance and care in carrying out this exercise. If you have any concerns during the period of construction, please contact the following:**
