

# Attention Motorists:

*PIPE LAYING IN PROGRESS ON RICHMOND STREET, P.O.S.*

## THE NATIONAL GAS COMPANY OF TRINIDAD AND TOBAGO LIMITED (NGC)

advises of the construction of a 50mm/152mm diameter carbon steel service main as follows:

- **Location – Government Campus Plaza, Richmond Street, POS**
- **Start Date – Monday 23rd June, 2008**
- **Time – Daily between 6am and 6pm**

The process involves in part, the installation of a 50mm diameter tie-in valve and gas main along Ajax Street by a combination of open cut trenching and Horizontal Directional Drilling across and along Ajax Street respectively. A 152mm diameter line will also be installed across Richmond Street by Open Cut Trenching method. Motorists and pedestrians are advised to exercise caution as there will be movement of heavy machinery and

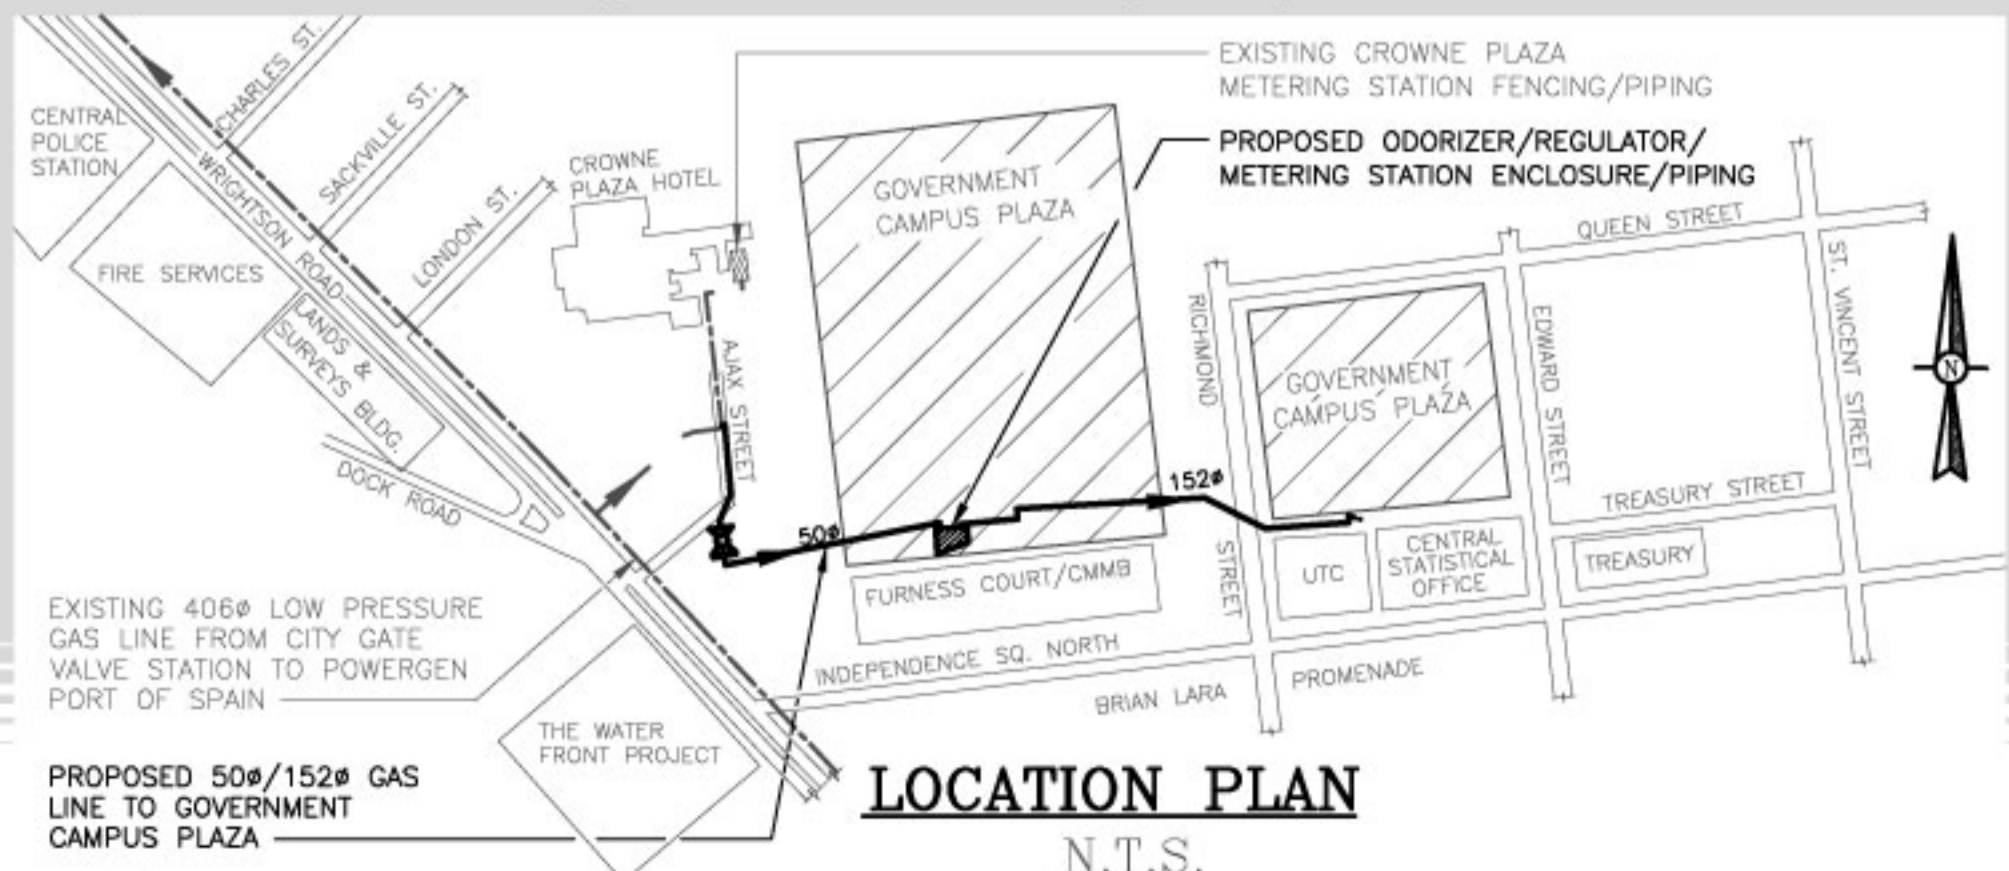

other associated equipment. A Traffic Management Plan will be in effect during construction in order to minimise disturbance to traffic flow.

Works on this project are expected to last for six weeks.

NGC wishes to assure that in all its operations, it adheres to the most stringent safety guidelines, and that it will make every effort to ensure that this activity poses no risk to the public.

If you have any concerns, please call the following number:
