National Association of Athletics Administrations*

“I wish on behalf of the Olympic Committee to commend the NGC for its unquestionable loyalty and support towards the sport of track and field.”

*Brian Lewis, President,
Trinidad and Tobago Olympic Committee*

At The National Gas Company of Trinidad and Tobago Limited (NGC), we see our role in the development of our nation's athletes as more than just a policy of corporate responsibility. It is about fulfilling the greater national purpose for which we exist.

This is the reason behind our relationship with the National Association of Athletics Administrations (NAAAs), an organisation which plays a crucial role in providing coaching, administrative and other support services to over fifty track and field clubs nationwide.

We deepened our commitment to this relationship with a \$12 million sponsorship of the NAAAs' activities for the period 2015 to 2017. This will go a long way to help raise the standards of organisation, performance and achievement for many sporting clubs and talented athletes on the local and international stages.

For us at NGC, it is a great privilege to fulfill our role in building a track record of success of which Trinidad and Tobago can be proud.
